

ENR

**Priorities**

**Mainstreaming**

# Issues Raised

- **Lack/inadequate Capacity building for ENR & CC in Local Governments (LGs)**
- Existing capacity building initiatives tend not to address ENR specific capacity needs
- Lack of data and uncoordinated data management
- Lack/inadequate enforcement of ENR policies and laws
- Poor coordination and synergies among ENR and CC actors
- Lack/inadequate regulation of production, transportation and trade in charcoal
- Oil and gas monitoring
- Air pollution and monitoring
- No new undertaking but continue with old undertaking

# Priority Issues

## **1. Resource mobilization (Innovative Funding Mechanisms)**

- Regional structures to each develop a funding proposal (one per region)

## **2. Control Charcoal production, transportation and trade in charcoal**

- **Circulars, guidelines,**
- **Impound and auctioning**
- **Identify and promote alternative energy including species for charcoal**

# Means to the End

- **Improve Coordination and synergies**
- Disconnect between ENR at both central and at Local Government levels
- Establish a national Coordination Forum of ENR and CC actors (MWE MDAs, ENR & CC CSOs, DPs)
- Create a forum for ENR coordination at Local government levels – a committee
- Retooling – Equipment, Guidelines, Manuals and procedures
  - Technical backstopping and guidance
  - Mapping of all existing government programmes and projects to identify those with ENR components and the focus areas of the components
  - ENR Reporting by Local Governments – Capacitate ENR Regional structures to handle
