Today's weather Summary:

Cloudy conditions with light showers over Lake Victoria region dominated most of the country in the morning. Later in the afternoon, sunny intervals continued, developing into light showers scattered over parts of the Lake Victoria basin, Karamoja sub region, Central Northern and Elgon ranges.

Further outlook: Light showers are expected across the country in the next three days, as ITCZ shifted southward over our region plus the influences of mountains, Vegetable and water bodies in Uganda hence orographic lifting, convective heating making atmosphere unstable which favour thundershowers' development in the afternoon.
