DAILY WEATHER FORECAST

Date of Issue **Thursday 21st August, 2025**

Forecast for: **Thursday 21st to Friday 22nd August, 2025.**

Duty Forecasters: **Kabasita D. Tel +256 414 320 920**

Today's weather Summary: Sunny intervals dominated most of the country, except for parts of the central northern, Karamoja, and Albertine regions that experienced light showers. In the afternoon, sunny intervals continued, developing into light showers over parts of the Lake Victoria basin, Rwenzori ranges, mid-western, central northern, and West Nile.

Further outlook: The expected weather in Uganda—afternoon thundershowers and potential flash floods—is driven by the ITCZ, moisture advection, intense daytime heating, and topographic enhancement. These factors will create unstable conditions for convective rainfall in the next three days.
